

LSUHSC-Shreveport

Department of Cellular Biology & Anatomy

2018 Fall Seminar Series

Seminars begin at **11:30 am** in Room 8-201 (Anatomy Conference Room)

September 20	Catherine Proenza, PhD Associate Professor Physiology & Biophysics University of Colorado at Denver	Molecular physiology of cardiac pacemaking
September 27	Hyung W. Nam, Ph.D Pharmacology, Toxicology and Neuroscience LSUHSC-Shreveport	Neurogranin regulation in the cardiovascular system
October 25	Xiaohong Lu, PhD Pharmacology, Toxicology and Neuroscience LSUHSC-Shreveport	Genetic and cognitive windows into circuit mechanisms of psychiatric disease
November 29	Shenuarin Bhuiyan, PhD Pathology LSUHSC-Shreveport	Mitochondrial Dynamics in Cardiac Proteotoxicity
December 6	Jonathan Steven Alexander, PhD Molecular & Cellular Physiology LSUHSC-Shreveport	Bryostatin-1 and transplantation
December 20	Shashanka Rao Graduate Student Cellular Biology & Anatomy LSUHSC-Shreveport	Nicotinamide nucleotide transhydrogenase (NNT) impacts endothelial function and cardiovascular disease development
