

Message

from the Chancellor's Office

April 29, 2016

Dear Students, Faculty, Staff, Alumni and Friends:

I am pleased to announce that I have conferred the academic rank of Professor Emeritus on two very-deserving faculty members, who are retiring today.

Over more than 30 years, Dr. Fleurette Abreo, has made numerous significant contributions in research, teaching and service. With national and international recognition for her scientific work, she has brought distinction to the Department of Pathology and the Health Sciences Center. In 2012, Dr. Abreo received the Allen A. Copping Award, the highest teaching honor given in the LSU System. She recently served as Faculty President and was selected to serve on the School of Medicine Medical Curriculum Council. For her outstanding contributions, she has earned the designation of Professor Emeritus of Pathology.

Dr. Tak Yee Aw joined the Department of Molecular and Cellular Physiology in 1990 and became a full professor in 1998. During her 26 years of service, Dr. Aw has set a remarkable standard of excellence both as an educator and researcher. An outstanding role model for the other faculty in the department and institution, she is an internationally-recognized researcher and one of the most highly cited faculty members at LSUHSC-S. I am pleased to appoint Dr. Aw to the academic rank of Professor Emeritus of Molecular and Cellular Physiology.

Please join me in congratulating these extraordinary faculty members, thanking them for their service and wishing them well in retirement.

Sincerely,

G. E. Ghali, DDS, MD, FACS, FRCS(Ed)
Interim Chancellor & Dean
